

MCSC

Hospital
Leadership
Innovation

Do you create AI-based solutions? See how your technology can help save lives.

If you're working with AI, now is the time to turn your attention to the healthcare sector. In a world where technology and medicine are increasingly intertwined, the MCSC Hospital Leadership Innovation competition is becoming a key platform for AI creators, IoT innovators, and software providers looking to make their mark in the medical industry.

MCSC is an international competition for startups and innovators, providing a unique opportunity to validate ideas where they truly matter – in clinical practice.

The initiator and main organizer of MCSC is the Institute of Mother and Child. Today, our innovation ecosystem includes 16 hospitals working together to develop cutting-edge solutions for the healthcare sector.

We are creating a space where innovations address real healthcare needs – together with Polish hospitals, innovators, and industry experts, we support solutions that transform the daily lives of patients and medical staff.

In this year's edition of the competition, we are looking for innovations in four key areas:

- Hospital automation and management
- Analytics and support for managerial decision-making
- Medical innovations
- Digital patient services and cybersecurity

**Don't wait for the future.
Create it together with us.**

What do you gain by participating?

Mentorship support – Gain access to industry experts who will help you refine your product and go-to-market strategy. A major benefit of the competition is a series of exclusive webinars for the TOP20 and TOP10 participants, offering free insights into legal issues, pitching, media relations, and more. One of the TOP10 startups will also be invited to join Sebastian Kulczyk's InCredibles mentoring program for the most promising entrepreneurs.

Access to investors and decision-makers – Present your solution to hospital representatives, investment funds, and tech companies during DemoDay, one of the competition's key events.

Hospital pilot program – The winning solution will be piloted at the Institute of Mother and Child and in partner hospitals, offering a chance to test your product or service in real-world clinical conditions and receive invaluable feedback.

Increased visibility – Participation means a chance to build brand recognition in the medical, MedTech, HealthTech, and related sectors.

Detailed information and the application form are available on the official competition website:
